

# Golden Globe Cedar

*Thuja Occidentalis 'Golden Globe'*

- ❁ 'Golden Globe' is a dwarf, dense cultivar with a rounded, globular form. Soft yellow, scale-like foliage in flat sprays.
- ❁ Urn-shaped cones mature in autumn to reddish brown. Most often seen as a 2-4 foot high shrub.
- ❁ Thrives in enriched, evenly moist, loamy, well-drained soils; dislikes dry conditions.

**Height: 2-3 feet**

**Zone: 3**

Full Sun

Low Maintenance

Evergreen

Moist, Well-Drained
