

Blue Stem Goldenrod

Solidago caesia

- ☼ Clumps of arching blue-green stems clad with lanced shaped green leaves bearing loose clusters of tiny, bright yellow flowers in late summer to fall.
- ☼ Useful as a specimen, in groups or massed as a ground cover. Provides excellent late summer to early fall bloom for rock gardens, beds, border fronts, cottage gardens or native plant areas.
- ☼ Native to Ontario & Quebec

Height: 18-36 Inches

Zone: 4

To help you identify the different varieties of Goldenrod we write a code on the side of the pot. The code Blue Stem Goldenrod is CA
