

# Goat's Beard

*Aruncus Dioicus*

- ❁ Monstrous border plant, spectacular in flower with its enormous creamy plumes the size of your head. Elegant lacy leaves form a very dense and bushy clump. This plant demands space.
- ❁ Cut plants back in summer if they look untidy. Good for cutting, the flowers may also be dried by hanging upside down in a warm, dark room.
- ❁ Great for beside a pond or stream.

Height: 4-5 Feet

Zone: 2

Full Sun

Partial Sun

Moist, Well-Drained

Cut Flower/Foliage
