

Mayapples

Podophyllum Peltatum

- ❁ Mayapple is a native woodland plant that is widespread across most of eastern North America
- ❁ All the parts of the plant, except the fruit, contain podophyllotoxin which is highly toxic if consumed
- ❁ The mostly unbranched 12-18 inch tall stems are topped with umbrella-like (peltate) leaves

Height: 12-18 Inches

Zone: 3

Partial Sun

Full Shade
