

# Red Arrow Culver's Root

*Veronicastrum virginicum* 'Red Arrow'

- ❁ Bears dense spikes of red buds which open from the top down into deep violet flowers from July to September on strong, upright stems. Smaller, branching lateral spikes create a candelabra-like effect when in full bloom. Resembles a large veronica except the leaves are in whorls.
- ❁ A must have plant for attracting pollinators & butterflies to your garden! Deer resistant.
- ❁ Native to Ontario & Manitoba

**Height: 4-6 Feet**

**Zone: 4**
